1. 8.6.1X: Sensors for Environmental Observations and Measurements

Release Date: 10-15-2014 Open Date: 10-15-2014 Due Date: 01-14-2015 Close Date: 01-14-2015

Summary: NOAA aims to improve the accuracy of observational data to meet the needs of all users by leveraging advanced technologies, following best practices, and fostering the use of national/international standards and traceability. This objective entails creating prototype sensors and methodologies that provide new technologies for detection, increased measurement accuracy, and impr ...

3. RFA-MD-15-003: HHS STTR RFA-MD-15-003

Release Date: 10-08-2014 Open Date: 12-23-2014 Due Date: 01-23-2015 Close Date: 01-23-2015

Purpose The purpose of this funding opportunity is to stimulate a partnership of ideas and technologies between innovative small business concerns (SBCs) and non-profit research institutions resulting in improving minority health and the reduction of health disparities by commercializing innovative technologies. Healthy People 2020 defines a health disparity as a particular type of health differ ...

Release Date: 10-15-2014Open Date: 10-15-2014Due Date: 01-14-2015Close Date: 01-14-2015

Summary: Passive acoustics has been increasingly used for population estimation during shipboard cetacean surveys conducted by NMFS Science Centers. Towed linear arrays are well-developed but are limited in their ability to provide real-time 3D localization. This is important for application to deep-diving species such as beaked whales, and for real-time localization of a single ...

Release Date: 10-15-2014Open Date: 10-15-2014Due Date: 01-14-2015Close Date: 01-14-2015

Summary: The Caribbean Sea, Gulf of Mexico, and Straits of Florida contain spawning areas for a number of ecologically and economically important reef, mesopelagic, and pelagic fish species. However, little is known regarding the transport and distribution of fish larvae throughout the area. Understanding the degree of biological connectivity between remote marine areas by means ...

Release Date: 10-15-2014Open Date: 10-15-2014Due Date: 01-14-2015Close Date: 01-14-2015

Summary: Many climate-sensitive businesses and activities focus on variables that could be derived from the wide range of meteorological variables produced by the NWS Climate

Forecast System v2 (CFS2). Examples include degree-days in energy and agriculture, potential wind and solar power in renewable energy, and wildfire risk in wildland management. To serve such business us ...
